

NEW! Stuart Undergrad Hotplate Stirrers

Stuart introduces the stylish and economical range of Undergrad, general purpose hotplate stirrers. The Undergrad range has been designed with safety as well as performance in mind, with an innovative LED temperature indicator scale and a “Hot” warning light which stays on, even when the hotplate is switched off and unplugged from the mains. The specifically designed chassis takes up less bench space, makes storage easier and allows for a retort base to fit underneath.

The Stuart® range of Undergrad hotplates includes dedicated hotplates and stirrers as well as combination hotplate stirrer models, the majority of which are available in a choice of ceramic or coated metal tops.

Video demonstrations and further specifications available at www.thebesthotplatestirrer.com
